

## EXECUTIVE SUMMARY

On November 8, 2000 the Division received a renewal application to operate a conveyor and conveyor parts manufacturing facility in Hebron, Kentucky for state origin permit number S-95-163 (Revised). The Division did not take action on this application. A review of this application and the facility files was undertaken in April of 2005. On April 26, 2005 the Division for Air Quality received additional information from HK Systems, Incorporated pertaining to the renewal application received in 2000 as a result of phone correspondence. The review of the application and correspondence with the facility personnel led to the facility submitting a letter requesting a Federally Enforceable State Operating Permit (FESOP). This letter was received by the Division on June 17, 2005. Additional information pertaining to the air toxics analysis was received on August 14, 2005. The applications are processed under Activity ID number APE20050001 and were determined to be complete on August 14, 2005.

The issuance of a Federally Enforceable State Operating Permit (FESOP) requires a preliminary determination and public notice. This has been done by the Division. An advertisement was placed in the Florence Boone County Recorder on September 8, 2005. The thirty-day comment period has expired with no comments received.

In conclusion, a thorough analysis has been made of all relevant information available, which pertains to this application. The Division has concluded that compliance with the permit will assure compliance with all air quality regulations and requirements.
